

Your Mission: Aliens from OUTSIDE of our Supercluster need to send us a package containing the CURE FOR GLOBAL WARMING!!! How will they address the package??

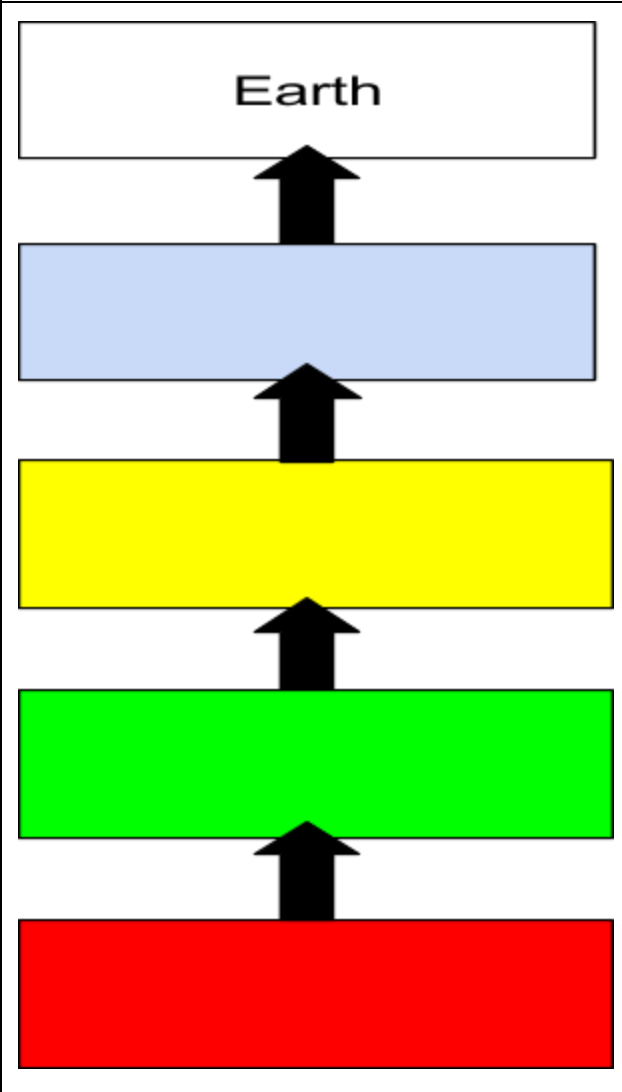

Part 1: How do addresses work?

Write your address if someone sent you a letter from outside the USA on the envelope below:

Part 2: Earth's Address in the universe

Research with your group what levels you would need to send something from OUTSIDE our Supercluster to Earth.

Use these resources to fill in the flow chart:	Fill in the flowchart to show how a package would travel to Earth from outside of our Supercluster:
