

Moon Phase Partner Practicum

Directions:

- Test your partner's knowledge of the phases of the moon using the model
- Your partner should use the Sun, Moon, and Earth to diagram where the moon is in relation to the Earth during each of the phases below
 - You may use the ruler to help you with your line of vision... remember to view the Moon from the position of Earth.
- Use the following key to show their progress:

✓ Correct

✗ Struggled and need to practice this phase more

- Once you finish assessing each other on the chart below continue to practice with quizlet 2

Partner Name: _____
