So far, in the Scientific method unit, we've discussed. Define them in your own words:

Control group	
Experimental group	
Variable	
Constants	
Observations	
Quantitative observations	
Qualitative observations	
Questions	
Inferences	

Why have we been learning all of these things together, what is the "big picture" – where do you think this unit will lead us – what should you be able to do by the end?

_____

_____

_____

_____

Our next step is HYPOTHESIS – what do you think that is?

_____

_____
